

BOGMAT

BOGMAT are used to protect grass and soft ground from vehicle tyres and to prevent vehicles from getting stuck in soft ground. 2.4 x 1.2m mats have over 1600 studs on each side; one side provides grip to the tyres, while the other side grips the ground.

They are moulded from a special grade of UV-stabilised recycled polyethylene resin which is designed for long outdoor life. The material used allows the mats to flex without breaking even under the weight of a heavy truck, while being rigid enough to spread the wheel load.

Benefits:

- ✓ Traction studs on both sides
- ✓ Non-slip surface
- ✓ Relatively light and safe to handle
- ✓ Long lasting outdoor use
- ✓ Protect ground from damage
- ✓ Prevent bogged vehicles

Applications:

- ✓ Construction works
- ✓ Infrastructure maintenance
- ✓ Golf courses and sports fields
- ✓ Parks and gardens
- ✓ Landscaping
- ✓ Eco-sensitive areas

Specifications:

Size: 2400mm x 1200mm
Weight: 36kg
4 easy carry handles

Size: 2400mm x 600mm
Weight: 18kg
2 easy carry handles

Size: 1200 x 600mm
Weight: 9kg
2 easy carry handles
