MADE IN ENGLAND

The Hockley

BT Approved Insulated Battery Tools Kit

The Hock - 2019, BT Insulated tool kit for use on all DC /UPS power system batteries in the BT/EE estate.

Richard Hockley has been senior DC power policy manager and ETSI representative for environmental standards and in BT service for 42 years.

In addition the BT Power Policy Team were key contributors to the development of the VRLA battery for telecoms applications in the 70s/80s and the creation of the British standard for VRLA batteries at the time. Richard also contributed to developing and installing resilient DC power solutions for the 2012 UK Olympics.

We named this kit to honour 'The Hock'
